SUMMARY

A final-year B.Tech Information Technology student who possesses a strong interest in software development and hands-on experience building real-world applications. Skilled in Python, Java, SQL, and backend technologies, with a solid foundation in programming, APIs, databases, and problem-solving. Experienced in developing and improving applications with a focus on clean, reliable, and maintainable solutions. Successfully led and delivered complex projects, continuously learning new technologies and contributing effectively to a growing software team.

PROFESSIONAL EXPERIENCE

Software Development Intern — HOGC

Jun 2026 – Present

- Contributing to the development of a multi-tenant IAM system using Python, FastAPI, SQLAlchemy, and PostgreSQL.
- Working on user management, authentication, REST APIs, and database integration.
- Collaborating on backend development, debugging, testing, and code integration using Git.

Key Skills: Python, FastAPI, SQLAlchemy, PostgreSQL, REST APIs, JWT, Git, Backend Development

Python Intern (Training Program) — Besant Technologies

Nov 2025 – Dec 2025

- Completed structured training in Python fundamentals, including data types, control flow, functions, and problem-solving.
- Practiced concepts through guided exercises and hands-on tasks to build a strong programming foundation.
- Developed the ability to independently build small-scale applications using core Python concepts.

Key Skills: Python, Programming Fundamentals, Control Structures, Functions, Problem-Solving, Basic Application Development

Java Developer Intern — CodeAlpha

Jun 2025 – Jul 2025

- Developed 3 console-based applications (Student Grade Tracker, Stock Trading Simulator, AI Chatbot) using Java.
- Applied OOP, Java Collections, and File I/O for modular application development and data handling.
- Implemented rule-based logic and basic NLP to build interactive chatbot functionality.

Key Skills: Java, OOP, Data Structures, Collections, File I/O, Basic NLP, Problem-Solving.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL, C (Basics)

Frameworks & Libraries: FastAPI, SQLAlchemy

Databases: PostgreSQL, MySQL, SQLite

Web & API Technologies: HTML5, REST APIs

Tools & Technologies: Git, GitHub, Alembic, VS Code, Jupyter Notebook

AI & Development Tools: Claude, Antigravity, ChatGPT

Technical Concepts: OOP, Data Structures, Authentication & Authorization, JWT, Database Design, File Handling, SHA-256 Hashing

Professional Skills: Logical Thinking, Problem-Solving, Team Collaboration, Documentation, Communication, Time Management

PROJECTS

Forensic File Authentication & Chain of Custody System (Python)

- Developed a forensic tool to verify file authenticity using SHA-256 hashing and file signature analysis.
- Implemented detection of disguised/mismatched file types by comparing extensions with magic numbers.
- Built a Chain of Custody logging system using SQLite to securely track evidence handling.
- Designed a Tkinter-based GUI and integrated PDF report generation for automated forensic reporting.

Identity & Access Management (IAM) Application | Python, FastAPI, PostgreSQL, SQLAlchemy, JWT, Alembic

- Developed a multi-tenant IAM backend with organization, user, identity, and credential management.
- Implemented JWT authentication, user registration/login, password hashing, and REST APIs using FastAPI.
- Designed a layered architecture using services, repositories, SQLAlchemy ORM, and Alembic migrations.
- Applied secure authentication practices and database design for scalable backend development.

Java Console Applications — AI Chatbot, Stock Trading Simulator & Student Grade Tracker

- Developed 3 console-based applications using Java and OOP principles.
- Used Collections (ArrayList, Map) and File I/O for efficient data handling and persistence.
- Implemented rule-based chatbot logic and basic NLP for interactive communication.
- Applied Resolved complex workflow bottlenecks by implementing streamlined processes, demonstrating strong problem-solving skills. and structured programming to build functional applications.

EDUCATION

Jeppiaar engineering college

B.Tech in Information Technology

Chennai

2023-Expected in 2027

St. Anne's Girls Higher Secondary School

School Education – Class X

Senior School Education – Class XII

Chennai

2020-2021

2022-2023

ACHIEVEMENTS

- 1st Place** — Ideathon 2025, Jeppiaar Engineering College
- 1st Place** — Project Expo 2025, Jeppiaar Engineering College
- Participant** — Smart India Hackathon (SIH), National-Level Competition
- Participant** — FuturaX 2025 Ideathon & After Effect, Jeppiaar Engineering College.

CERTIFICATIONS

- AI Learnathon** — Fundamentals of Generative AI — GUVI | AICTE | NASSCOM | HCLTech
- Python Bootcamp** — LetsUpgrade | NSDC | ITM Edutech | GDG MAD
- Java Programming Internship Certificate** — CodeAlpha
